

VINITHA GOWTHEEPAN

ADDRESS: 13,WRASSE CRESCENT, SOUTH HEDLAND EMAIL: SREEVINITHAA@GMAIL.COM MOB: 0499702703/0409813361

PERSONAL PROFILE

A keen, self-motivated well competent IT professional. To excel in the fields of Analysis, Design, Programming and Database. My objectives and inspiration Contribute to the growth of the organization attached to, work for betterment of the society, while making advances in the carrier, personal performance and living, through continuous acquisition and enhancement of knowledge and skills.

EDUCATION

- Successfully completed **BSc.(Hons) Software Engineering with second class(upper) in** Informatics Institute of Technology (**IIT**) conducted by University of Westminster(UK)2009.

PROFESSIONAL QUALIFICATIONS

- **Sun certified in Java Programmer(SCJP)**
- **Microsoft Certified Technology Specialist (MCTS)**

CORE COMPETENCIES

- | | | |
|-------------------------------|-------------------------------|---------------------------|
| ▪ ASP.NET | ▪ OOP/OOD | ▪ HTML |
| ▪ C#.NET | ▪ Software Architecture | ▪ JavaScript |
| ▪ .NET framework | ▪ UML | ▪ XML |
| ▪ MS SQL | ▪ J2EE (Servlets, EJB) | ▪ J2SE (Core Java) |
| ▪ VB.Net | ▪ Java | ▪ MySQL |
| ▪ OLEDB/ADO/ODBC/JDBC/ADO.NET | ▪ Logi reports | ▪ SQL Reporting Service |
| ▪ LINQ | ▪ Coollite | ▪ MVC |
| ▪ Android | | ▪ JQuery |

RIDMA student scholarship portal

Business Problem : It's a web application to manage their sponsors, students and reports to load scholarship amount due.

Environment: .NET Framework 4.5, MVC 5, MS SQL 2014, JavaScript , JQuery

Project Role: Lead

URL : ridmainc.azurewebsites.net

Map

Senior Software Engineer

Business Problem: Map is developed as web application and which provides marketing services for Car dealers.

Environment: .NET Framework 4.5, MVC 5, MS SQL 2014, JavaScript , JQuery, Telerik,Xmpie Server.

Project Role: Senior Software Engineer

URL: <http://www.map4dealer.com/map>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- *Responsible for assuring code quality*

DealerSense

Senior Software Engineer

- ***Business Problem***: DealerSense is developed as web application and which provides marketing services for Car dealers.

Environment: .NET Framework 4.5, MVC, MS SQL 2012, JavaScript, JQuery, SQL Reporting Service

Project Role: Senior Software Engineer

URL: <https://www.dealersense.net/Account/Login?ReturnUrl=%2F>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Lead Sri Lankan team whenever Tech Lead is not in Sri Lanka
- Test, debug, and refine the computer software to produce the required product
- *Responsible for assuring code quality*

Interactive Tel Reports and Mobile App

Senior Software Engineer

- Business Problem: Interactive Tel is the 3rd party mobile integration service company. Did web Reporting part and Mobile Chat application for them.

Environment: .NET Framework 4.5, MVC, MS SQL 2012, JavaScript , JQuery, Titanium Studio, Android Sdk, Web API

Project Role: Senior Software Engineer

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Lead Sri Lankan team whenever Tech Lead is not in Sri Lanka
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality

MacHaik

Senior Software Engineer

Business Problem: Mac Haik CRM is developed as web application and at high level this would cover Manage Customers and Internet, Walk-in and Phone-up Prospects; Manage Workflow/Activity of Dealership; Manage Digital Assets such as emails and templates, forms and documents; Manage Configuration and Administration. Integrations with manufacturer lead submission programs, Reports and DMS Push/Pull are exclude in this project.

Environment: .NET Framework 4.0, MVC, MS SQL 2008, JavaScript, JQuery, SQL Reporting Service

Project Role: Senior Software Engineer

URL: <http://navotar.com/machaikQa>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.

- Lead Sri Lankan team when ever Tech Lead is not in Sri Lanka
- Test, debug, and refine the computer software to produce the required product
- *Responsible for assuring code quality*

FordRedemption

Software Engineer

Business Problem: Online Website for Car Dealers.

Environment: .NET Framework 4.0, MVC, MS SQL 2008, JavaScript, JQuery, SQL Reporting Service

Project Role: Software Engineer

URL: <http://fordcampaigns.com/>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality

DealerUps

Software Engineer

Business Problem: DealerUps is a reimplementaion of the DealerUps CRM solution. This solution enables the dealerships to continually and effectively manage and market to all current customers and prospects, including internet leads, walk-ins, incoming telephone calls and service customers.

Environment: .NET Framework 3.5, ASP/C#.NET, MS SQL 2008, JavaScript, Coollite, SQL Reporting Service

Project Role: Software Engineer

Url:<http://dealerups.ecarlist.com/dealerx/>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality

Car Rental

Software Engineer

Business Problem: Car Rental is an On-Demand Rental Management Software offers advanced solution for managing and improving dealership rental business. This system provides functionalities required to manage automobile dealerships registered with the system. It manages leads, customers, dealer accounts, vehicle models, pricing, rent out vehicles and etc.

Environment: .NET Framework, ASP/C#.NET, MS SQL, JavaScript,Logi Reports

Project Role: Associate Software Engineer, Software Engineer

URL: <http://www.navotar.com/>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality
- Set up QA and Staging environment
- Responsible for managing releases

ICRAC

Associate Software Engineer

Business Problem: Online vehicle selling and management system. This system provides functionalities to client management, invoice management, claim management and vehicle management.

Environment: .NET Framework, ASP/C#.NET, MS SQL, JavaScript

Project Role: Associate Software Engineer

URL: <http://www.navotar.com/ICRAC/Demo/Login.aspx>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality
- Set up QA and Staging environment
- Responsible for managing releases

Sitswap

Associate Software Engineer

Business Problem: Online babysitting exchange system for moms.

Environment: .NET Framework, ASP/C#.NET, MS SQL, JavaScript

Project Role: Associate Software Engineer

URL: <http://www.sitswap.ca/>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product
- Responsible for assuring code quality
- Set up QA and Staging environment
- Responsible for managing releases

Money Transfer

Associate Software Engineer

Business Problem: Automating the process of electronic money transfer of small business.

Environment: .NET Framework, C#, MS SQL, ASP.NET

Project Role: Associate Software Engineer.

URL: <http://www.navotar.com/TFIGLOBAL/>

- Analyze and study complex system requirements.
- Implementation: Translates detailed design into computer software
- Enhance software to reduce operating time or improve efficiency.
- Test, debug, and refine the computer software to produce the required product

Blood Related Medical Diagnosis system

My final year Research project is Called Blood related medical diagnosis system which diagnose the blood related disease. This is being developed using **AI** technology and implemented using **Java** with Database **MySQL**.

Environment: J2EE, MySql

Innovay (Pvt) Ltd-projects
Trainee Software Developer

Environment: .NET Framework, ASP/C#.NET, MS SQL, JavaScript, php, MySql

Project Role: Associate Software Engineer

- Analyze and study complex system requirements.
- Design using **Object Oriented Concepts** and Implement the application and Upgrade on customer requirements
- Develop database schema and related data access queries.
- Configure web/application servers.
- **Develop** and **Test** web applications using **php,ASP.NET** (.NET Framework 3.0), **MS SQL Server (2005)**, and **OOP Concepts**
- Preparing user manuals
- Making Presentations

WORKING EXPERIENCE

- 2010 Feb-2011 July Worked As Associate Software Engineer in Iparadim
- 2011 July-2012 Worked As Software Engineer in Creo360 pvt Ltd
- 2012 July-2015 Worked As Senior Software Engineer in Creo360 pvt Ltd
- 2017-2019 Developed RIDMA student portal.
